### **DETAILED ACTION**

1. This is in response to applicant's amendment and response filed April 1, 2004, in which claims 1-2,4,6-28 are pending.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section made in this
 Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-2,4,6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Arai (U.S. patent No. 5,517,551).

As to claim 1, Arai discloses a private branch exchange (101) system (figure 1) comprising: a plurality of mobile stations (109 to 114) each having a plurality of extension numbers and a plurality of different line keys (external line 1) (311 of figure 4)and physically present thereon (column 2, lines 31-46, column 4, lines 11-24 and figure 1,4 and 5A-C, 7-8). Arai discloses a base station (fixed units) wirelessly connected to the plurality of mobile stations (109-114), (figure 1). Arai discloses an exchange station (102) for performing call control of the plurality of mobile stations through the base station (column 2, lines 31-46 and figures 1,11)

As to claim 2, Arai discloses at least one of said plurality of extension numbers set for the plurality of mobile staion is a unique extension number for

Art Unit: 2684

each of the plurality mobile stations (column 6, lines 15-25).

As to claim 4, Arai discloses all limitations as explained in claim 1, further more, Arai discloses the plurality of mobile stations has the same extension number as that of one predetermined other mobile stations (column 6, lines 15-25).

As to clam 6, Arai discloses a plurality of mobile stations (109 to 114) each having a plurality of extension numbers (external lines 1-n) and each extension number having a different line key (118) set for said plurality of extension numbers respectively (column 2, lines 31-46, column 4, lines 11-24 and figure 1,4 and 5A-C, 7-8).

As to claims 7-11, Arai discloses the plurality of mobile stations each have line buttons for setting the plurality of lines (316) (depressing speech button (S751) (figures 5A-C, 6 and 13).

As to claims 10-11, Arai discloses the plurality of mobile stations each have line buttons for setting the plurality of lines (316) (depressing speech button (S751) (figures 5A-C, 6 and 13).

### Allowable Subject Matter

4. Claims 12-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does teach the call control section performs call

Art Unit: 2684

control of the plurality of mobile sections based on the direction sent from the line state control section. This limitation in conjunction with all limitations of the independent claims, have not been disclosed, taught, or made obvious over the prior art of record.

## Response to Argument

5. Applicant's arguments filed 4/1/04 have been fully considered but they are not persuasive.

On page 11, fifth paragraph applicant's response, argued that Arai does not teach mobile units.

The examiner disagrees. Arai teaches mobile units 109-114) (see figure 1). Further more, Arai teaches also a PBX (102) with wired extension telephones (103-105) under control of main control unit (102) (figure 1).

On page 12, first paragraph of response, applicant argued that the line keys 12 are not to be confused with display 15.

The examiner disagrees. The line keys as per specification page 7, lines 19-21, line keys 12 for setting a telephone line for each extension number possessed by mobile staions (10a to 10c).

This teaching is an analogeous to teaching of Arai (column 3, lines 17-20 and figure 4).

Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the

Aft Unit: 2684

objections made. Further, they do not show how the amendments avoid such references or objections.

#### **Conclusion**

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Suzuki et al (5,978,667) dislcoses PBX and plurality of extensions and mobile stations and private and public extension are interfacing to each other mechanism (figure 1).

Schumacher et al (5,841,854) dislcoses plurality of extension numbers and mobile stations are interfacing to each other (figure 1).

Mitsuo dislcoses PBX including extension numbers and mobile stations are intefacing each other, (abstract and figure 1).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tilahun B Gesesse whose telephone number is 703-308-5873. The examiner can normally be reached on flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nay Maung can be reached on 703-308-7745. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
